| Avian Influenza Collaborative Project | Research Initiative | This multinational research is aimed at modeling the transmission dynamics of Avian Influenza (AI) spill-over from birds to humans using field data from different regions (Asia, Africa, Latin America). The expected project output is an ecological model for AI spill-over which will help us predict these events as well as inform and focus our global Avian and Pandemic Influenza prevention and response activities. This is one of the few multi-national ecological studies to develop an understanding of the critical elements of spillover and transmission of influenza which integrates diverse fields of expertise (ecologists, geospatial technology experts, modelers, virologists, and epidemiologists) and will produce a predictive model. By providing supplements to Fogarty grantees, this activity leverages FIC's multi-disciplinary network of current grantees, and it promotes sample and data sharing. | CDC/OS | Global Health: Infectious Diseases. | **FIC** | Empowering Biomedical Research Community: Global Health. | 2009 | 1,714,006 |
| Behavioral and Social Sciences in HIV Vaccine Clinical Research | Meeting/Workshop | The purpose of this workshop was to identify how HIV vaccine and Behavioral and Social Science (BSS) researchers, along with relevant communities, could undertake a more collaborative and integrative approach to the area of HIV vaccine clinical research. The workshop sought to identify challenges and opportunities as well as break new ground operationally to advance such an approach.<br><br>During the 1.5 day workshop, presentations on key BSS topics, methodology, and experiences were presented and discussed. A community panel shared their experiences and insights related to trial participation and community engagement. To formulate concrete recommendations for addressing specific BSS issues in upcoming HIV vaccine clinical research, participants divided into groups to discuss the following topics: social impact, risk assessment, community engagement, informed consent, risk reduction, and special populations. | CDC | HIV/AIDS. | NIAID/NIMH/OD | Health Care Reform: Behavioral Science and Health Research Economics. | 2008 | 0 |
| Behavioral Aspects of Pre-Exposure Prophylaxis (PrEP) Counseling for Intermittent Exposure | Research Initiative | The purpose of this agreement is to delineate and authorize implementation of collaboration for an HIV/AIDS prevention research program between the CDC's National Center for HIV/AIDS, Viral Hepatitis, Sexually Transmitted Diseases, and Tuberculosis Prevention, and NIMH. | Collaborative Meeting - National Institute on Drug Abuse and the Centers for Disease Control and Prevention | Committee/Workgroup | Discuss mechanisms for information sharing about upcoming initiatives, demonstration projects, or surveillance updates that may affect future directions in science. (SBIR contract solicitation on developing implementation packages for evidence-based HIV prevention intervention materials for drug users--concept #129.) | CDC | Social/Behavior Research. | **NIDA** | Health Care Reform: Behavioral Science. Translational Research. | 2008 | 0 |
| Combination Biomedical HIV Prevention Modalities: Research Design and Ethical Considerations | Meeting/Workshop | The purpose of this workshop was to review the potential impact of recent successful HIV prevention modalities on the design of subsequent prevention research studies, explore how these prevention modalities might affect the operational and ethical considerations of future prevention research, and identify research gaps and potential collaborations among prevention scientists working in multi-modality HIV prevention research. Potential topics to be discussed include: design of prevention trials (complexity of trials, sample size determinations, and choosing appropriate outcome measures); ethics of prevention trials (informed consent process, recruitment/retention, coercion, and standard of care delivery to trial participants); modeling the impact of multi-modalities on prevention studies; and integrating one or more prevention modalities into future prevention studies. | CDC | HIV/AIDS. | **NIAID**/NIMH/OD | Health Care Reform: Behavioral Science and Health Research Economics. | 2009 | 20,000 |
| Community Participation in Research (R01) | Research Initiative | Solicit grant applications that propose intervention research on health promotion, disease prevention, and health disparities that communities and researchers jointly conduct. | CDC | Accelerate Discovery to Improve Patient Care: Specific category priorities not reported. | Conference on Newborn Screening and Developmental Disorders in the Middle East and North Africa | Meeting/Workshop | NLM assisted in the organization of a conference on newborn screening and developmental disorders in the Middle East and North Africa that was held in Qatar in April 2010. The goal of the meeting was to establish or strengthen newborn and early childhood screening in the region with the goal of establishing international collaborations on rare conditions. One of the important issues discussed was the development of regional registries and databases that are interoperable. | CDC/HRSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Early Childhood Health Development. Global Health: Non-Infectious Diseases. Health Care Quality/Patient Safety. Nutrition/Obesity. | NICHD/**NLM** | Empowering Biomedical Research Community: Global Health. Health Care Reform: Health Information Technology. | 2010 | 0 |
| Consensus Development Conference: Inhaled Nitric Oxide Therapy for Premature Infants | Meeting/Workshop | The final product of an NIH Consensus Conference is a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. Inhaled nitric oxide therapy was approved by the U.S. Food and Drug Administration in 2000 to treat term and near-term infants with respiratory failure. Since its approval, researchers have examined expanding the use of inhaled nitric oxide therapy to treat premature babies born at less than 34 weeks gestation. Studies to evaluate its safety and efficacy for these infants have had mixed results in terms of key outcomes. The goal of this conference is to clarify the role of inhaled nitric oxide in this population. This meeting has not yet occurred. | AHRQ/CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Early Childhood Health Development. Health Care Quality/Patient Safety. HIV/AIDS. Nutrition/Obesity. Social/Behavior Research. | NHLBI/NICHD/**OD** | NONE | 2009 | 152,000 |

| Consensus Development Conference: Lactose Intolerance and Health | Meeting/Workshop | The final product of an NIH Consensus Conference is a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. The goals of this conference were to examine the prevalence of lactose intolerance, the health outcomes of diets that exclude dairy products, the amount of dietary lactose tolerable in individuals with intolerance, and to identify effective strategies for managing lactose intolerance. The panel concluded that the true prevalence is not known. Many individuals who think they are lactose intolerant are not. Many individuals with real or perceived lactose intolerance avoid dairy and ingest inadequate amounts of calcium and vitamin D. In most cases, individuals do not need to eliminate dairy consumption completely. | AHRQ/CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Nutrition/Obesity. | NIA/NICHD/ NIDDK/**OD** | NONE | 2008 | 170,000 |
| Consensus Development Conference: Vaginal Birth After Cesarean: New Insights | Meeting/Workshop | The final product of an NIH Consensus Conference is a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. A number of factors have contributed to a decline in the VBAC rate since the mid-1990s. The conference was convened to provide a thorough evaluation of the relevant research, to help pregnant women and providers make decisions about mode of delivery after a previous cesarean delivery. The panel concluded that trial of labor is a reasonable option for many pregnant women with one prior low transverse uterine incision. Trial of labor and elective repeat cesarean have important risks and benefits that differ for the woman and her fetus. A shared decision-making process should be adopted and, whenever possible, the woman's preference should be honored. | AHRQ/CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | Dynamics of Health, Aging, and Body Composition (Health ABC) | Research Initiative | Major objectives relate to observations that change in body composition in old age, particularly the increase in body fat and the decline in lean mass and bone mineral, represent a common pathway by which multiple diseases contribute to disability. There are many unanswered questions regarding the patterns and health impact of changes in weight and body composition in old age. Weight generally increases over the lifetime until late middle age, then tends to decrease into old age with changes in muscle, fat and bone. It has been postulated that the accelerated loss of muscle and strength in old age contributes to the onset of disability. Studies of weight and its relationship to mortality in older persons have yielded contradictory findings, leading to controversy regarding public health recommendations for weight in old age. Few studies have examined weight-related morbidity in old age, especially among African-Americans. | CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | NCCAM/**NIA**/NIDDK | Health Care Reform: Health Information Technology. | 1997 | 0 |

| Federal Partners in the Gulf Long-Term Follow-up (GuLF) Study Working Group | Committee/Workgroup | The Federal Partners in the Gulf Long-Term Follow-up (GuLF) Study Working Group is an interagency group of Federal agencies responding to potential health effects of the Deepwater Horizon oil spill disaster. The working group was convened to provide input on the design and conduct of the Gulf Long-Term Follow-up (GuLF) study, a longitudinal study of oil spill clean-up workers led by the National Institute of Environmental Health Sciences with support from the NIH Common Fund, NIH OD and BP. Working group members share ideas on ways to maximize interagency efficiency and effectiveness by working collaboratively on areas of common interest and sharing data and samples collected by their agencies, they identify data collection needs that could be met by the GuLF study rather than duplicate surveys to the same population, and they identify agency resources that could be brought together to improve the GuLF study. Scientific oversight for the study is provided by the National Academy of Science's Institute of Medicine. | ACF/ATSDR/ CDC/CMS/FDA/ HRSA/OS/ SAMHSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | HPTN 052 A Randomized Trial to Evaluate the Effectiveness of Antiretroviral Therapy Plus HIV Primary Care versus HIV Primary Care Alone to Prevent the Sexual Transmission of HIV-1 in Serodiscordant Couples | Research Initiative | These Clinical studies are based on data collected in Africa and Thailand. There is a correlation between HIV viral load (blood levels) and HIV transmission. Specifically, the higher the viral load in the blood, the more likely the chance for transmission. Antiretroviral therapy (ART) reduces the viral load in the blood, as well as in genital secretions (for both men and women), and the drugs can be detected in semen and vaginal and cervical secretions. All of this information strongly suggests that ART may make HIV-infected people less contagious. HPTN 052 compares the HIV-infection rates of two groups of HIV-serodiscordant couples. | CDC | Global Health: Infectious Diseases. | Institute of Medicine (IOM) Youth Concussions Project | Committee/Workgroup | This project began from interest among members of the Institute of Medicine (IOM)/National Research Council (MRC) Board on Children, Youth, and Families (BCYF) in developing a new activity focused on the topic of sports concussions in youth. A series of conference calls were held in early March 2010 focused on the health and educational issues associated with concussions/mild brain trauma among school-ages populations. The IOM first wanted to explore the need for a workshop or study that could identify key research findings, examine current policies and programs, and offer informed guidance for clinical practices, sports management, and educational settings. Congressional staff have also expressed interest in encouraging IOM to conduct a research review in this area, comparable to the 2002 IOM workshop on the consequences of head impact in youth soccer. To date: 1) IOM has secured funds for "planning meeting" towards a workshop; 2) IOM invites NICHD to attend a planning for the planning meeting on October 1, 2010; and 3) IOM in interested is securing funds for workshop. | CDC | Early Childhood Health/Development. | Mapping of the SNOMED CT and ICD Clinical Terminology | OTHER: Content Services | The U.S. Department of Health and Human Services (HHS) has set a goal for the nationwide implementation of an interoperable health information technology infrastructure to improve the quality and efficiency of health care. Achieving this goal will require that key clinical data elements are captured or recorded in detailed, standardized form (using standard vocabularies, codes, and formats) as close to their original sources (patients, health care providers, laboratories, diagnostic devices, etc.) as possible. If these standardized clinical data can also be used to generate HIPAA-compliant billing transactions automatically, this will provide another incentive for adoption of clinical data standards. For automated generation of bills from clinical data to become a reality, robust mappings from standard clinical terminologies to the HIPAA code sets must be created. | CDC/OS | Global Health: Strategic Initiative. | NIH State-of-the-Science Conference: Diagnosis and Management of Ductal Carcinoma In Situ (DCIS) | Meeting/Workshop | NIH State-of-the-Science Conference provides a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. With the increasing prevalence of DCIS of the breast and our current inability to determine those women with DCIS at high risk for invasive breast cancer, the purpose of the conference was to critically evaluate the available data on diagnosis and management. The panel concluded that much remains unknown in this area, but strong consideration should be given to remove the anxiety-producing term "carcinoma" from the description of DCIS. The primary question for future research should focus on the accurate identification of patient subsets diagnosed with DCIS who may be managed with less intervention. | AHRQ/CDC/FDA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Health Care Quality/Patient Safety. | NCI/**OD** | Health Care Reform: Comparative Effectiveness Research and Health Disparities. | 2007 | 0 |
| NIH State-of-the-Science Conference: Family History and Improving Health | Meeting/Workshop | NIH State-of-the-Science Conference provides a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. Given the unprecedented proliferation of genomic information and the possibility of health care reform, this conference was convened to clarify the role of the family history, its validity in the primary care setting, and its effect on individual and population health outcomes. The panel recognized that family history has an important role in the practice of medicine and may motivate positive lifestyle changes, enhance individual empowerment, and influence clinical interventions. The panel found that it is currently unclear how this information can be effectively gathered and used in the primary care setting for common diseases. | AHRQ/CDC/ HRSA/OSG | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Health Care Quality/Patient Safety. | NCI/NHLBI/ NHGRI/NIAAA/ NICHD/NIDA/ NIMH/NINR/**OD** | NONE | 2007 | 0 |
| NIH State-of-the-Science Conference: Preventing Alzheimer's Disease and Cognitive Decline | Meeting/Workshop | NIH State-of-the-Science Conference provides a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. The goals of this conference were to examine the factors associated with an increased or decreased risk of Alzheimer's or cognitive decline and the risks and benefits of proposed interventions to improve or maintain cognitive function. The panel concluded that firm conclusions currently cannot be drawn about the association of any modifiable risk factor with cognitive decline or Alzheimer's. Evidence is insufficient to support the use of pharmaceutical agents or dietary supplements. A large amount of promising research is under way; these efforts should be increased. | AHRQ/CDC/CMS | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | Nutritional Biochemistry in the Age-Related Eye Disease Study 2 (AREDS2) | Research Initiative | AREDS2 is a multi-center randomized trial designed to assess the effects of oral supplementation of high doses of macular xanthophylls (lutein and zeaxanthin) and/or omega -3 LCPUFAs (DHA and EPA) for the treatment of AMD and cataract. The primary objective of AREDS2 is to evaluate the effect of dietary xanthophylls (lutein/zeaxanthin) and/or omega-3 LCPUFAs (DHA and EPA) on progression to advanced AMD. This objective will be accomplished by collecting and assessing the data on approximately 4,000 AREDS2 participants aged 50 to 85 years, who at the time of enrollment have either: 1) bilateral large drusen, which are yellow deposits under the retina, or 2) large drusen in one eye and advanced AMD (neovascular AMD or central geographic atrophy) in the fellow eye. | CDC | Accelerate Discovery to Improve Patient Care: Translate basic science into new therapies. | Obesity and the Built Environment Program | Research Initiative | To begin understanding the wide variety of issues relating to the built environment and obesity, the NIEHS released RFA-ES-04-003, Obesity and the Built Environment, in August, 2004. Research proposals were to examine two specific areas related to the built environment and obesity: understanding the role of the built environment in causing/exacerbating obesity and related co-morbidities; and developing, implementing, and evaluating prevention/intervention strategies that influence parameters of the built environment in order to reduce the prevalence of overweight, obesity and co-morbidities. Participating NIH institutes included NCI, NICHD, and OBSSR, and two Centers within the CDC. | CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public, Innovative Biomedical Methodologies, and Translate basic science into new therapies. | NCI/NICHD/**NIEHS**/OD | Health Care Reform: Behavioral Science. | 2005 | 0 |
| Obesity in Children with Developmental and/or Physical Disabilities | Meeting/Workshop | Meeting to discuss the research needs regarding obesity in children with developmental and/or physical disabilities. | CDC | Early Childhood Health/Development. Nutrition/Obesity. | NCRR/NHLBI/ NIAMS/**NICHD/** NIMH/NINR/OD | Health Care Reform: Health Disparities. | 2010 | 0 |
| Oral Health, Cancer Care, and You | Public Education Campaign | A series of publications to inform health care providers and patients about steps they can take before, during, and after cancer treatment to reduce the risk and impact of these often painful side effects. | CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | NCI/**NIDCR**/NINR | NONE | 1999 | 13,900 |
| Partners in Information Access for the Public Health Workforce | Information Clearinghouse | Partners in Information Access for the Public Health Workforce is a collaboration of U.S. government agencies, public health organizations, and health sciences libraries which provides timely, convenient access to selected public health resources on the Internet. | AHRQ/CDC/ HRSA/OS | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Health Care Quality/Patient Safety. | **NLM** | Health Care Reform: Comparative Effectiveness Research, Health Information Technology, and Patient Safety. | 1997 | 0 |
| Partnership for AIDS Vaccine Evaluation (PAVE) | Committee/Workgroup | Member of a consortium of U.S. Government agencies and funded organizations involved in AIDS vaccine clinical trials (2009 only). | CDC | Accelerate Discovery to Improve Patient Care: Innovative Biomedical Methodologies, Innovative Biomedical Technologies, and Patient-centered Research. | Phenylketonuria (PKU) | Meeting/Workshop | A two-day scientific conference on PKU and other forms of hyperphenylalaninemia is planned to take place within the next 12-18 months. NIH last published screening and management guidelines for PKU as the result of a Consensus Conference held in October 2000. Developments since that time regarding PKU and treatment strategies have made it time to revisit those guidelines. NIH established five Working Groups to generate and address specific questions related to: 1) Diet Control and Management; 2) Pharmacologic Interventions; 3) PKU and Pregnancy; 4) Long-Term Cognitive Outcomes and Follow-up; and 5) Molecular Testing, New Technologies, and Epidemiologic Considerations. | AHRQ/CDC/FDA/ HRSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | President's Emergency Plan for AIDS Relief (PEPFAR) - Monitoring and Evaluation Technical Working Group | Committee/Workgroup | The PEPFAR Monitoring and Evaluation Technical Working Group is charged with providing support to countries impacted by HIV/AIDS to successfully and sustainably plan, monitor, evaluate, and report on data-driven, evidence-based prevention care and treatment programs supported by PEPFAR. | CDC/HRSA | Global Health: Infectious Diseases. HIV/AIDS. | **FIC** | Empowering Biomedical Research Community: Global Health. | Unknown | 0 |
| President's Emergency Plan for AIDS Relief (PEPFAR) Implementation Science and Public Health Evaluation Activities | Research Initiative | PEFPAR is governed by intra-agency groups, including NIH, CDC, and HRSA for HHS. CDC has a large role as an implementing partner for PEPFAR, while NIH has limited their activities to providing technical expertise on issues related to safety and efficacy of elements for PEPFAR programs, and to facilitating evaluation of PEPFAR through NIH funded investigators. The Agencies work together to set research and evaluation priorities for PEPFAR. In previous years, this was done through the PHE process, and in FY10 a specific funding announcement was made with supplement awards through NIH Institutes and Centers. NIH takes an active role in reviewing and making recommendations for the PHE process, CDC and HRSA were actively involved in the review process for the NIH supplement applications. | CDC/HRSA/ SAMHSA | Accelerate Discovery to Improve Patient Care: Fast-track innovation planning and regulatory review and Patient-centered Research. | Standards for Genetic Testing Report | Research Initiative | This activity aims to develop a standard reporting format, using LOINC and HL7, for NLM's Personal Health Record Project and activities of the Office of the Secretary. | AHRQ/CDC/OS | Accelerate Discovery to Improve Patient Care: Innovative Biomedical Technologies. Health Care Quality/Patient Safety. Pharmacogenomics. | NHGRI/**NLM** | Health Care Reform: Health Information Technology. | 2007 | 0 |
| Standing Committee on Use of Emerging Science for Environmental Health Decisions of the National Academy of Sciences | Committee/Workgroup | The standing committee will examine, explore, and consider issues on the use of emerging science for environmental health decisions. For this process, it will provide a public venue for communication among government, industry, environmental groups, and the academic community about scientific advances in methods and approaches that can be used in the identification, quantification, and control of environmental impacts on human health. | CDC/FDA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public and Innovative Biomedical Technologies. Pharmacogenomics. | NICHD/**NIEHS** | High-throughput Technology. Translational Research. Regulatory Science. | Unknown | 550,000 |
| State Cancer Profiles | Database | The objective of the State Cancer Profiles Web site is to provide a system to characterize the cancer burden in a standardized manner in order to motivate action, integrate surveillance into cancer control planning, characterize areas and demographic groups, and expose health disparities. The focus is on cancer sites for which there are evidence-based control interventions. Interactive graphics and maps provide visual support for deciding where to focus cancer control efforts. | CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | **NCI** | Health Care Reform: Health Disparities. | 2004 | 100,000 |
| Strategic Multisite Initiative for the Identification, Linkage and Engagement in Care of Youth with Undiagnosed HIV Infection (SMILE in CARING for YOUTH) | Research Initiative | The Adolescent Medicine Trials Network for HIV/AIDS Interventions (ATN) was awarded grant money to expand their project of increasing availability of HIV testing for adolescents 12-24 and the provision of adolescent-focused healthcare services for those adolescents who are diagnosed with HIV infection. The project's expansion includes all the ATN sites across the US and Puerto Rico. NICHD is collecting data to evaluate the effectiveness of adolescent oriented linkage to care services for the HIV infected adolescents. This collaboration has the potential to improve the health of American youth, both by identifying those with undiagnosed HIV and bringing them into adolescent-friendly treatment programs and by reducing the chances of them further spreading the virus to others. | CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. HIV/AIDS. Social/Behavior Research. | **NICHD**/NIDA/NIMH | Health Care Reform: Behavioral Science and Health Disparities. | 2009 | 0 |
| Studying Community Programs to Reduce Childhood Obesity (BAA HC-10-15) | Research Initiative | The NHLBI led the development of the solicitation of BAA HC-10-15, and several NIH ICs including NIDDK, NCI, NICHD, OBSSR and CDC worked collaboratively to refine it. The purpose of the BAA was to fund one study that would systematically evaluate existing community programs and policies targeting childhood obesity. The goal is to learn what is working to reduce childhood obesity and to identify research gaps. The award for the BAA contract was made in mid-August 2010 and now the NIH and CDC are working together to refine and finalize the protocol for the study. The study will evaluate 30,000 children in 300 communities, and will collect retrospective and prospective data. | CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | Ten years post PKU Consensus Conference: State of the Science | Committee/Workgroup | The purpose of this collaboration is to have a scientific discussion to address management of phenylketonuria (PKU) in light of recent research findings. Screening and management guidelines for PKU were last published as the result of a Consensus Conference held in October 2000, and there have been new developments since that time. This new discussion will consider the state of the science in the areas of diet control and management; pharmacologic interventions; PKU and pregnancy; long-term cognitive outcomes and follow-up; and molecular testing, new technologies, and epidemiologic considerations. We are convening working groups to generate and address specific questions related to these topics. In parallel, an AHRQ Evidence-based Practice Committee is independently evaluating the use of newly available pharmaceutical interventions relative to dietary interventions for PKU, with the NIH as a partner in this process. We plan to host a conference in late 2011 (or early 2012) after the AHRQ review process, to discuss the conclusions and recommendations of the working groups. | AHRQ/CDC/FDA/ HRSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public, Innovative Biomedical Methodologies, Innovative Biomedical Technologies, Patient-centered Research, and Translate basic science into new therapies. | The HHS Influenza Fact Sheet | Committee/Workgroup | In an effort to "get out the word" about the availability of HHS influenza technologies, an informational document was developed detailing HHS technology transfer practices and polices, particularly as they pertain to influenza vaccine and diagnostic technologies. This document was prepared at the request of the HHS Office of the Secretary, Office of Global Health Affairs and is available online in English, Spanish, Chinese, and Vietnamese. The document summarizes the HHS position regarding seeking patent protection and granting of licenses to these patent portfolios as well as unique biological materials. It specifically highlights that HHS activities involving influenza intellectual property and biological materials have been consistent with these policies and provides information on the technologies available for commercial development by a suitable license applicant. The document encourages organizations from any country to apply for a license for the various influenza technologies and highlights certain features of the license agreements meant to encourage broad dissemination of products, such as no royalties on products donated or sold at cost to public institutions for use in developing countries. | CDC | Global Health: Infectious Diseases. | NIAID/**OD** | NONE | 2009 | 0 |
| The Medical Education Partnership Initiative (MEPI) | Training Initiative | The Medical Education Partnership Initiative (MEPI) awards grants to foreign institutions in Sub-Saharan African countries which receive PEPFAR support and their partners to develop or expand and enhance models of medical education in Sub-Saharan Africa. These models are intended to support PEPFAR's goal of increasing the number of new health care workers by 140,000, strengthen medical education systems in the countries in which they exist, and build clinical and research capacity in Africa as part of a retention strategy for faculty of medical schools and clinical professors. | CDC/HRSA | Global Health: Infectious Diseases and Strategic Initiative. | Unified Medical Language System Metathesaurus (UMLS) | OTHER: Data Services | NLM's Unified Medical Language System (UMLS®) facilitates the development of computer systems that behave as if they understand the meaning of the language of biomedicine and health. To that end, NLM produces and distributes the UMLS Knowledge Sources (databases) and associated software tools (programs) for use by system developers in building or enhancing electronic information systems that create, process, retrieve, integrate, and/or aggregate biomedical and health data and information, as well as in informatics research. By design, the UMLS Knowledge Sources are multi-purpose. | AHRQ/CDC/ CMS/FDA | Global Health: Strategic Initiative. | We Can! (Ways to Enhance Children's Activity and Nutrition) | Public Education Campaign | Through the We Can! program, the NIH and other HHS partner agencies disseminate strategies, tools, and resources to community organizations, the general public, healthcare providers, and other groups. Strategies focus on three behaviors: eating right, moving more, and reducing screen time to help prevent obesity in youth. Parents and caregivers of 8-13 year olds are the primary focus of the program's outreach, followed by the youth themselves. | CDC/HRSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | Work Group on Harmonizing Hemoglobinopathy Data Sets | Committee/Workgroup | The mission of the Workgroup for Harmonizing Hemoglobinopathy Data Sets is to create a resource for federal programs and extramural communities to use in data systems which incorporate data elements in hemoglobinopathies. Specifically this entails establishing a Hemoglobinopathies Uniform Medical Language including: 1) Identifying specific goals and objectives for the kind of data that are required by these programs; 2) Case definitions for electronic data systems at all levels; 3) Consensus about conditions and data elements to be included; and 4) Differentiation between data needs for surveillance and for registries/biorepository. | CDC/HRSA | Early Childhood Health/Development. | Work, Family and Health Network | Research Initiative | The Administration for Children and Families, Office of Planning, Research and Evaluation is providing NICHD funds to partially support the "Work, Family, and Health Network," a research project of NICHD. This project is examining the effects of a workplace intervention designed to reduce work-family conflict and thereby improve the health and well-being of employees and their families. There is a modification agreement and the purpose of the modification agreement is to provide continuation of research support for the Work, Family and Health Network (WFHN) "Limited Competition for Evaluating the Health Benefits of Workplace Policies and Practices." The WFHN evaluated the health benefits of workplace policies and practices aimed at ameliorating work-family conflict. | ACF/CDC | Early Childhood Health/Development. | Working Groups to Develop Federal HIV/AIDS Prevention and Treatment Guidelines | Committee/Workgroup | The U.S. Department of Health and Human Services issues Federal guideline documents for the prevention and medical management of HIV infection and issues surrounding HIV infection. The guidelines are written, reviewed, and updated by Working Groups of HIV experts, including physicians, pharmacists, researchers, and HIV treatment advocates. These Working Groups function under the auspices of the NIH Office of AIDS Research Advisory Council (OARAC). | CDC/FDA/HRSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | Workshop on New Research Directions for Chronic Disease Prevention in the Workplace | Meeting/Workshop | The objective of this workshop was to provide recommendations for a comprehensive and coordinated research plan to prevent chronic diseases in adults through worksite interventions. The workshop used a conceptual framework drawn from an integrative approach to chronic disease prevention at worksites. The workshop included three panel discussion sessions: 1) promoting individual behavior change; 2) changing the work environment (physical, psycho-social and organizational); and 3) addressing workplace interventions within the context of family and community health. Based on the presentations from the three panels, the workshop participants outlined a framework for a research agenda to integrate health promotion and health protection approaches. | CDC | NONE | **NHLBI** | NONE | 2009 | 0 |
