HIV/AIDS. | **OD** | NONE | 2003 | 0 |
| Affordable and Accessible Hearing Health Care for Adults with Mild to Moderate Hearing Loss August 25-27, 2009 | Meeting/Workshop | According to Healthy People 2010, only 16 to 17 percent of adults between the ages of 20 and 69 with hearing impairment have used hearing aids, and only 25 to 29 percent of adults ages 70 and over with hearing impairment have used them. Hearing health researchers cite multiple reasons for the gulf that exists between those who need and those who have hearing aids, with cost as an important factor. Since a hearing aid's lifespan is only 4-5 years, a hearing aid wearer could spend tens of thousands of dollars on aids over his or her lifetime. In August 2009, this issue was explored during a working group sponsored by the NIDCD. The goal of the meeting was to develop a research agenda that could help increase the accessibility and affordability of hearing health care for adults with mild to moderate hearing loss. | FDA/HRSA | Accelerate Discovery to Improve Patient Care: Specific category priorities not reported. | Annual Tribal Budget Consultations | Meeting/Workshop | In compliance with Executive Order 13175, the Secretary of HHS convened Annual Tribal Budget Consultation sessions in 8 of 10 HHS regions. Tribal Affairs, Office of Intergovernmental Affairs coordinated and executed the sessions. Accordingly, each Federal agency must have an accountable process to ensure meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications. While HHS and a number of its operating divisions have established a consultation process, the NIH has not established such a process. NICHD participated in the Denver session held in HHS Region 8. | ACF/AoA/AHRQ/ ATSDR/CDC/ CMS/FDA/HRSA/ IHS/OS/OSG/ SAMHSA | NONE | **NICHD** | Empowering Biomedical Research Community: Workforce Diversity. | Clinical Decision Support (CDS) Federal Collaboratory and Inventory of Federal Clinical Decision Support Activities | Committee/Workgroup | A federal community of interest focused on clinical decision support, and a compilation of project summaries describing CDS activities that are either funded by the US Federal government, or that are being executed by agencies of the government. The term Clinical Decision Support (CDS) describes a variety of tools and technologies that are used within electronic clinical information systems to improve the quality, safety, efficiency and effectiveness of patient care. CDS provides clinicians, staff, patients, and other key decision makers with knowledge and person-specific information, intelligently filtered at appropriate times, to enhance health and health care. CDS encompasses computerized alerts and reminders, clinical guidelines, order sets, order entry feedback, patient data reports and dashboards, documentation templates, diagnostic support, and the presentation of contextually relevant reference information within clinical information systems. NLM has submitted to the Collaboratory and Inventory summaries of NLM projects involving Clinical Decision Support. | AHRQ/CDC/ HRSA/IHS/OS | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public, Fast-track innovation planning and regulatory review, and Innovative Biomedical Technologies. | CC/**NLM** | Health Care Reform: Health Information Technology. | Unknown | 0 |
| Community Health Worker Initiative | Public Education Campaign | The Community Health Worker (CHW) Initiative supports activities to reduce disparities in cardiovascular risk factors and asthma in African Americans, Latino, American Indian, and Filipino population groups. The project uses formative research (literature reviews, focus groups, and workshops) to inform the development and implementation of approaches that integrate CHW activities into the broader health workforce to improve cardiovascular health and reduce asthma disparities. | HRSA/IHS | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public and Non-Infectious diseases. | Healthy People 2020 | Committee/Workgroup | Healthy People provides science-based, 10-year national objectives for promoting health and preventing disease. Since 1979, Healthy People has set and monitored national health objectives to meet a broad range of health needs, encourage collaborations across sectors, guide individuals toward making informed health decisions, and measure the impact of our prevention activity. Currently, Healthy People 2010 is leading the way to achieve increased quality and years of healthy life and the elimination of health disparities. Healthy People 2020 is currently assessing the objectives of the past decade, measuring the impact of its prevention activity, and developing new 10-year targets. | AHRQ/ATSDR/ CDC/FDA/ HRSA/OS | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | NIDAMED - Resource Materials for Medical and Health Professionals | Training Initiative | NIDAMED is designed to assist medical professionals as the first line of defense against substance abuse and addiction by providing tools and resources to help screen patients for drug use. SAMHSA attended a meeting on the initial prototype and provided feedback on documents used to develop the site and materials. NIDA has partnered with HRSA to distribute NIDAMED materials, in particular a poster encouraging patients to discuss their drug use with their doctors, to over 26,000 health centers across the country. | HRSA/SAMHSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Health Care Quality/Patient Safety. Tobacco Prevention and/or Control. | **NIDA** | Health Care Reform: Patient Safety. | 2009 | 17,100 |
| NIH State of the Science Conference: Enhancing Use and Quality of Colorectal Cancer Screening | Meeting/Workshop | The NIH State of the Science Conference on Colorectal Screening provided a responsible assessment of currently available data on enhancing use and quality of colorectal cancer screening to health care providers, patients, and the general public. | AHRQ/CDC/ CMS/HRSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | NIH State-of-the-Science Conference: Family History and Improving Health | Meeting/Workshop | NIH State-of-the-Science Conference provides a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. Given the unprecedented proliferation of genomic information and the possibility of health care reform, this conference was convened to clarify the role of the family history, its validity in the primary care setting, and its effect on individual and population health outcomes. The panel recognized that family history has an important role in the practice of medicine and may motivate positive lifestyle changes, enhance individual empowerment, and influence clinical interventions. The panel found that it is currently unclear how this information can be effectively gathered and used in the primary care setting for common diseases. | AHRQ/CDC/ HRSA/OSG | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | Pediatric Emergency Care Applied Research Network (PECARN) | Research Initiative | Study of resuscitation practice and relationship to fulminant cerebral edema. PCCR program director is program official for the trial. This is a multisite clinical trial. The application was received as part of PAR HD 08-261/Emergency Medical Services for Children (EMSC). | HRSA | Early Childhood Health/Development. | **NICHD** | NONE | 2003 | 0 |
| Phenylketonuria (PKU) | Meeting/Workshop | A two-day scientific conference on PKU and other forms of hyperphenylalaninemia is planned to take place within the next 12-18 months. NIH last published screening and management guidelines for PKU as the result of a Consensus Conference held in October 2000. Developments since that time regarding PKU and treatment strategies have made it time to revisit those guidelines. NIH established five Working Groups to generate and address specific questions related to: 1) Diet Control and Management; 2) Pharmacologic Interventions; 3) PKU and Pregnancy; 4) Long-Term Cognitive Outcomes and Follow-up; and 5) Molecular Testing, New Technologies, and Epidemiologic Considerations. | AHRQ/CDC/FDA/ HRSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | President's Emergency Plan for AIDS Relief (PEPFAR) - Monitoring and Evaluation Technical Working Group | Committee/Workgroup | The PEPFAR Monitoring and Evaluation Technical Working Group is charged with providing support to countries impacted by HIV/AIDS to successfully and sustainably plan, monitor, evaluate, and report on data-driven, evidence-based prevention care and treatment programs supported by PEPFAR. | CDC/HRSA | Global Health: Infectious Diseases. HIV/AIDS. | **FIC** | Empowering Biomedical Research Community: Global Health. | Unknown | 0 |
| President's Emergency Plan for AIDS Relief (PEPFAR) Implementation Science and Public Health Evaluation Activities | Research Initiative | PEFPAR is governed by intra-agency groups, including NIH, CDC, and HRSA for HHS. CDC has a large role as an implementing partner for PEPFAR, while NIH has limited their activities to providing technical expertise on issues related to safety and efficacy of elements for PEPFAR programs, and to facilitating evaluation of PEPFAR through NIH funded investigators. The Agencies work together to set research and evaluation priorities for PEPFAR. In previous years, this was done through the PHE process, and in FY10 a specific funding announcement was made with supplement awards through NIH Institutes and Centers. NIH takes an active role in reviewing and making recommendations for the PHE process, CDC and HRSA were actively involved in the review process for the NIH supplement applications. | CDC/HRSA/ SAMHSA | Accelerate Discovery to Improve Patient Care: Fast-track innovation planning and regulatory review and Patient-centered Research. | Ten years post PKU Consensus Conference: State of the Science | Committee/Workgroup | The purpose of this collaboration is to have a scientific discussion to address management of phenylketonuria (PKU) in light of recent research findings. Screening and management guidelines for PKU were last published as the result of a Consensus Conference held in October 2000, and there have been new developments since that time. This new discussion will consider the state of the science in the areas of diet control and management; pharmacologic interventions; PKU and pregnancy; long-term cognitive outcomes and follow-up; and molecular testing, new technologies, and epidemiologic considerations. We are convening working groups to generate and address specific questions related to these topics. In parallel, an AHRQ Evidence-based Practice Committee is independently evaluating the use of newly available pharmaceutical interventions relative to dietary interventions for PKU, with the NIH as a partner in this process. We plan to host a conference in late 2011 (or early 2012) after the AHRQ review process, to discuss the conclusions and recommendations of the working groups. | AHRQ/CDC/FDA/ HRSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public, Innovative Biomedical Methodologies, Innovative Biomedical Technologies, Patient-centered Research, and Translate basic science into new therapies.
