| 4th National Conference on Genomics and Public Health | Meeting/Workshop | Three-day scientific conference held in December 2010. | AHRQ/CDC/HRSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | NCI/NHGRI/NICHD/**OD** | Translational Research. | 2006 | 0 |
| Adolescents in HIV Biomedical Prevention Clinical Trials | Meeting/Workshop | The purpose of this meeting was to examine and discuss the desirability and timing of as well as barriers to enrollment of adolescents in the HIV Biomedical Prevention Clinical Trials. Participants included representatives from academia, industry, HIV-affected communities, and various branches of the United States government and offered an expanse of expertise covering the medical, behavioral, ethical, legal and regulatory ramifications of including or not including adolescents in biomedical prevention trials. The deliberations from this consultation formed the foundation for the special July 2010 adolescent supplement in the Journal of Acquired Immune Deficiency Syndromes (JAIDS) entitled "Inclusion of Adolescents and Young Adults in Biomedical HIV Prevention Research." | FDA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public, Fast-track innovation planning and regulatory review, and Innovative Biomedical Methodologies. | Advancing the Science of Effective Behavioral Treatments in Primary Care | Meeting/Workshop | Meeting designed to assess the science of behavioral treatments for complex treatments in primary care and determine a research agenda for this topic area. | AHRQ/CMS/ HRSA/SAMHSA | Health Care Quality/Patient Safety. Social/Behavior Research. | NCI/NHLBI/ NIAAA/NIDA/NIMH/**OD** | Health Care Reform: Behavioral Science. | 2007 | 0 |
| Affordable and Accessible Hearing Health Care for Adults with Mild to Moderate Hearing Loss August 25-27, 2009 | Meeting/Workshop | According to Healthy People 2010, only 16 to 17 percent of adults between the ages of 20 and 69 with hearing impairment have used hearing aids, and only 25 to 29 percent of adults ages 70 and over with hearing impairment have used them. Hearing health researchers cite multiple reasons for the gulf that exists between those who need and those who have hearing aids, with cost as an important factor. Since a hearing aid's lifespan is only 4-5 years, a hearing aid wearer could spend tens of thousands of dollars on aids over his or her lifetime. In August 2009, this issue was explored during a working group sponsored by the NIDCD. The goal of the meeting was to develop a research agenda that could help increase the accessibility and affordability of hearing health care for adults with mild to moderate hearing loss. | FDA/HRSA | Accelerate Discovery to Improve Patient Care: Specific category priorities not reported. Global Health: Specific category priorities not reported. | **NIDCD** | Empowering Biomedical Research Community: Specifics not reported. Health Care Reform: Specifics not reported. | 2009 | 40,000 |
| Annual Tribal Budget Consultations | Meeting/Workshop | In compliance with Executive Order 13175, the Secretary of HHS convened Annual Tribal Budget Consultation sessions in 8 of 10 HHS regions. Tribal Affairs, Office of Intergovernmental Affairs coordinated and executed the sessions. Accordingly, each Federal agency must have an accountable process to ensure meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications. While HHS and a number of its operating divisions have established a consultation process, the NIH has not established such a process. NICHD participated in the Denver session held in HHS Region 8. | ACF/AoA/AHRQ/ ATSDR/CDC/ CMS/FDA/HRSA/ IHS/OS/OSG/ SAMHSA | NONE | **NICHD** | Empowering Biomedical Research Community: Workforce Diversity. | Behavioral and Social Sciences in HIV Vaccine Clinical Research | Meeting/Workshop | The purpose of this workshop was to identify how HIV vaccine and Behavioral and Social Science (BSS) researchers, along with relevant communities, could undertake a more collaborative and integrative approach to the area of HIV vaccine clinical research. The workshop sought to identify challenges and opportunities as well as break new ground operationally to advance such an approach.<br><br>During the 1.5 day workshop, presentations on key BSS topics, methodology, and experiences were presented and discussed. A community panel shared their experiences and insights related to trial participation and community engagement. To formulate concrete recommendations for addressing specific BSS issues in upcoming HIV vaccine clinical research, participants divided into groups to discuss the following topics: social impact, risk assessment, community engagement, informed consent, risk reduction, and special populations. | CDC | HIV/AIDS. | NIAID/NIMH/OD | Health Care Reform: Behavioral Science and Health Research Economics. | 2008 | 51,000 |
| Biannual Animal Welfare Meeting | Meeting/Workshop | The participating agencies share a common concern for the care and welfare of laboratory animals used in research and testing. Each agency, operating under its own authority, has specific responsibilities for fostering proper animal care and welfare. The biannual meetings set forth a framework for reciprocal cooperation which assists each agency in meeting its responsibilities in promoting proper laboratory animal care and welfare. The biannual meetings maintain and enhance agency effectiveness while avoiding duplication of efforts to achieve required standards for the care and use of laboratory animals. | FDA | NONE | **OD** | NONE | 1990 | 0 |
| Center for Excellence Expert Panel, Substance Abuse and Mental Health Services Administration (SAMHSA) Fetal Alcohol Spectrum Disorders Center for Excellence (FASD CE) | Meeting/Workshop | The NIAAA Deputy Director serves on the FASD Center for Excellence Expert Panel which provides advice and guidance to SAMHSA on a range of issues related to FASD and the SAMHSA FASD CE. | SAMHSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | **NIAAA** | NONE | 2008 | 0 |
| Circulating Tumor Cells (CTCs): Emerging Technologies for Detection, Diagnosis and Treatment | Meeting/Workshop | Presented several technologies under development for assessing the number and molecular biology of CTCs. Regulatory issues were also discussed. Meeting reviewed the results of work with CTCs to that time. Organized by Cancer Biomarkers Research Program, DCP, Cancer Diagnosis Program , DCTD and SBIR, and OD NCI. | FDA | Accelerate Discovery to Improve Patient Care: Innovative Biomedical Methodologies and Translate basic science into new therapies. | **NCI** | Translational Research. | Combination Biomedical HIV Prevention Modalities: Research Design and Ethical Considerations | Meeting/Workshop | The purpose of this workshop was to review the potential impact of recent successful HIV prevention modalities on the design of subsequent prevention research studies, explore how these prevention modalities might affect the operational and ethical considerations of future prevention research, and identify research gaps and potential collaborations among prevention scientists working in multi-modality HIV prevention research. Potential topics to be discussed include: design of prevention trials (complexity of trials, sample size determinations, and choosing appropriate outcome measures); ethics of prevention trials (informed consent process, recruitment/retention, coercion, and standard of care delivery to trial participants); modeling the impact of multi-modalities on prevention studies; and integrating one or more prevention modalities into future prevention studies. | CDC | HIV/AIDS. | **NIAID**/NIMH/OD | Health Care Reform: Behavioral Science and Health Research Economics. | 2009 | 0 |
| Consensus Development Conference: Inhaled Nitric Oxide Therapy for Premature Infants | Meeting/Workshop | The final product of an NIH Consensus Conference is a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. Inhaled nitric oxide therapy was approved by the U.S. Food and Drug Administration in 2000 to treat term and near-term infants with respiratory failure. Since its approval, researchers have examined expanding the use of inhaled nitric oxide therapy to treat premature babies born at less than 34 weeks gestation. Studies to evaluate its safety and efficacy for these infants have had mixed results in terms of key outcomes. The goal of this conference is to clarify the role of inhaled nitric oxide in this population. This meeting has not yet occurred. | AHRQ/CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Early Childhood Health Development. | Consensus Development Conference: Lactose Intolerance and Health | Meeting/Workshop | The final product of an NIH Consensus Conference is a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. The goals of this conference were to examine the prevalence of lactose intolerance, the health outcomes of diets that exclude dairy products, the amount of dietary lactose tolerable in individuals with intolerance, and to identify effective strategies for managing lactose intolerance. The panel concluded that the true prevalence is not known. Many individuals who think they are lactose intolerant are not. Many individuals with real or perceived lactose intolerance avoid dairy and ingest inadequate amounts of calcium and vitamin D. In most cases, individuals do not need to eliminate dairy consumption completely. | AHRQ/CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Nutrition/Obesity. | NIA/NICHD/ NIDDK/**OD** | NONE | 2008 | 350,000 |

| Consensus Development Conference: Vaginal Birth After Cesarean: New Insights | Meeting/Workshop | The final product of an NIH Consensus Conference is a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. A number of factors have contributed to a decline in the VBAC rate since the mid-1990s. The conference was convened to provide a thorough evaluation of the relevant research, to help pregnant women and providers make decisions about mode of delivery after a previous cesarean delivery. The panel concluded that trial of labor is a reasonable option for many pregnant women with one prior low transverse uterine incision. Trial of labor and elective repeat cesarean have important risks and benefits that differ for the woman and her fetus. A shared decision-making process should be adopted and, whenever possible, the woman's preference should be honored. | AHRQ/CDC | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Health Care Quality/Patient Safety. | NICHD/NINR/**OD** | NONE | 2008 | 350,000 |
| Countermeasures Against Chemical Threats (CounterACT) Research Network Annual Symposium | Meeting/Workshop | This workshop was organized by NINDS as part of the Countermeasures Against Chemical Threats (CounterACT) Research Network, a group formed to conduct basic, translational, and clinical research aimed at the discovery and/or identification of better therapeutic and diagnostic medical countermeasures against chemical threat agents. The 3-day meeting allowed researchers to share information, encouraged collaboration, and enabled NIH staff to evaluate the group's progress on themes such as nerve agents, seizure detection technology, cyanide, and sulfur mustard. | CDC/FDA/OS | Accelerate Discovery to Improve Patient Care: Innovative Biomedical Methodologies, Innovative Biomedical Technologies, Patient-centered Research, and Translate basic science into new therapies. | NEI/NIAID/ NIAMS/NICHD/ NIEHS/NIGMS/**NINDS** | High-throughput Technology. | NIH State-of-the-Science Conference: Diagnosis and Management of Ductal Carcinoma In Situ (DCIS) | Meeting/Workshop | NIH State-of-the-Science Conference provides a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. With the increasing prevalence of DCIS of the breast and our current inability to determine those women with DCIS at high risk for invasive breast cancer, the purpose of the conference was to critically evaluate the available data on diagnosis and management. The panel concluded that much remains unknown in this area, but strong consideration should be given to remove the anxiety-producing term "carcinoma" from the description of DCIS. The primary question for future research should focus on the accurate identification of patient subsets diagnosed with DCIS who may be managed with less intervention. | AHRQ/CDC/FDA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Health Care Quality/Patient Safety. | NCI/**OD** | Health Care Reform: Comparative Effectiveness Research and Health Disparities. | 2007 | 185,000 |
| NIH State-of-the-Science Conference: Family History and Improving Health | Meeting/Workshop | NIH State-of-the-Science Conference provides a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. Given the unprecedented proliferation of genomic information and the possibility of health care reform, this conference was convened to clarify the role of the family history, its validity in the primary care setting, and its effect on individual and population health outcomes. The panel recognized that family history has an important role in the practice of medicine and may motivate positive lifestyle changes, enhance individual empowerment, and influence clinical interventions. The panel found that it is currently unclear how this information can be effectively gathered and used in the primary care setting for common diseases. | AHRQ/CDC/ HRSA/OSG | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. Health Care Quality/Patient Safety. | NCI/NHLBI/ NHGRI/NIAAA/ NICHD/NIDA/ NIMH/NINR/**OD** | NONE | 2007 | 170,000 |
| NIH State-of-the-Science Conference: Preventing Alzheimer's Disease and Cognitive Decline | Meeting/Workshop | NIH State-of-the-Science Conference provides a written statement on a controversial medical topic prepared by an independent panel of health professionals free from conflicts of interest on the basis of the results of a systematic literature review, presentations by experts in the field, and public comments and questions. The goals of this conference were to examine the factors associated with an increased or decreased risk of Alzheimer's or cognitive decline and the risks and benefits of proposed interventions to improve or maintain cognitive function. The panel concluded that firm conclusions currently cannot be drawn about the association of any modifiable risk factor with cognitive decline or Alzheimer's. Evidence is insufficient to support the use of pharmaceutical agents or dietary supplements. A large amount of promising research is under way; these efforts should be increased. | AHRQ/CDC/CMS | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | Phenylketonuria (PKU) | Meeting/Workshop | A two-day scientific conference on PKU and other forms of hyperphenylalaninemia is planned to take place within the next 12-18 months. NIH last published screening and management guidelines for PKU as the result of a Consensus Conference held in October 2000. Developments since that time regarding PKU and treatment strategies have made it time to revisit those guidelines. NIH established five Working Groups to generate and address specific questions related to: 1) Diet Control and Management; 2) Pharmacologic Interventions; 3) PKU and Pregnancy; 4) Long-Term Cognitive Outcomes and Follow-up; and 5) Molecular Testing, New Technologies, and Epidemiologic Considerations. | AHRQ/CDC/FDA/ HRSA | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public. | Pilot Workshop on Behavioral and Social Sciences Research: Engaging Patients and Providers in Patient-Centered Primary Care | Meeting/Workshop | This co-sponsored research workshop provided an opportunity for CMS staff to learn about patient-provider communications and the impact of incentives in patient and provider behavior from NIH-funded research on these topics. Three researchers discussed their work and its implications within the context of CMS demonstrations related to the patient-centered medical home, but their findings have broad applicability to other demonstrations and initiatives aimed at engaging providers and patients in specific behaviors. | CMS | Accelerate Discovery to Improve Patient Care: Disseminate health information to the public and Patient-centered Research. | The Fort Belknap Research Symposium and Evidence-Based Practice Training | Meeting/Workshop | The research symposium and workshop on May 28 and 29, 2010, was a collaborative effort between research staff from the NIH, Clinical Center Nursing and Patient Care Services, Johns Hopkins University School of Nursing and the Indian Health Service. The training encouraged the use of evidence-based nursing practice in Indian Health Service, tribal, and urban health facilities to improve the quality of clinical judgments and patient care. The topic areas were selected by a collaborative planning group including tribal nurses from Ft. Belknap, Montana. Based on their identified community needs, the topics included methamphetamine use and intimate partner violence.<br><br>This was an opportunity for the Clinical Center to collaborate with a tribal community and the Indian Health Service to further train nurses that work in Native American communities. | IHS | Accelerate Discovery to Improve Patient Care: Patient-centered Research. | The Science of Small Clinical Trials | Meeting/Workshop | The Science of Small Clinical Trials, a course created jointly by the FDA's Office of Orphan Products Development (OOPD) and NIH's Office of Rare Diseases Research, (ORDR), dealt with issues arising in the design and analysis of clinical trials based on small study populations. While small clinical trials are a necessity in the context of rare diseases, being able to conduct small trials with scientific rigor is of increasing importance in other contexts, particularly as genomic science begins to provide opportunities for individualized pharmacology. 1,300 persons attended the course either in person or via Web streaming and completed the test leading to a certificate. | FDA | Accelerate Discovery to Improve Patient Care: Fast-track innovation planning and regulatory review, Innovative Biomedical Methodologies, and Patient-centered Research. | Workshop on New Research Directions for Chronic Disease Prevention in the Workplace | Meeting/Workshop | The objective of this workshop was to provide recommendations for a comprehensive and coordinated research plan to prevent chronic diseases in adults through worksite interventions. The workshop used a conceptual framework drawn from an integrative approach to chronic disease prevention at worksites. The workshop included three panel discussion sessions: 1) promoting individual behavior change; 2) changing the work environment (physical, psycho-social and organizational); and 3) addressing workplace interventions within the context of family and community health. Based on the presentations from the three panels, the workshop participants outlined a framework for a research agenda to integrate health promotion and health protection approaches. | CDC | NONE | **NHLBI** | NONE | 2009 | 35,000 |
