The following information must be included in the SIG Final Progress Report: (For clarity, please divide your report into the five topics below):

1) Header Information:
Grant Number:
Principal Investigator: (Name, Institution, Department, Address)
Funding Period
Name of Instrument (including manufacturer, model, and accessories)
Total Purchase Cost:
Total SIG award amount:
Other Sources of Funding: (if appropriate)

2) Describe the purchased SIG instrument, its usage and its impact on the research community, specifically the NIH funded users. **Use a summary table to list the names of the current Major Users (last, first), the complete supporting NIH grant numbers for each user (e.g. 5R01HL123456-01A1), brief titles of the projects and the percentage of use of the instrument by that user. For Minor Users that are not supported by NIH grants, indicate the funding agency or funding source in place of the grant number.**

3) Describe the administration, operation, and plans for the maintenance of the instrument. (Please provide current update).

4) Describe (in language understandable to the lay public) any research accomplishments resulting from the use of the instrumentation. Explain the developments in terms of their contributions to new knowledge and potential for the improvement of human health. Provide a list of publications, if available. (Please provide PMCID numbers).

5) Include any other additional information which you would consider useful to the NIH.
