What

The National Institutes of Health today announced the appointment of seven individuals to the NIH [Council of Councils](#). The council was established to advise the NIH Director on policies and activities of the Division of Program Coordination, Planning, and Strategic Initiatives (DPCPSI), including making recommendations on research that represents important areas of emerging scientific opportunities, rising public health challenges, or knowledge gaps that deserve special emphasis or would otherwise benefit from strategic planning and coordination.

The council is composed of 27 members nominated by the NIH Institutes and Centers (IC) and offices within the Office of the Director (OD). Council members bring knowledge of their individual IC and OD offices' missions and operations, not as official representatives, but to provide advice beyond the research agenda of any individual IC.

"I welcome these distinguished individuals to the Council of Councils," said Acting DPCPSI Director, and Council of Councils Chair, Robert W. Eisinger, Ph.D., "We look forward to gaining from their scientific knowledge and expertise in planning and conducting the diverse activities of the division."

The following members will serve terms on the council through Oct. 31, 2028:

- Monica Gandhi, M.D., M.P.H., University of California, San Francisco
- Rafael A. Irizarry, Ph.D., Harvard University, Boston, Massachusetts
- Barbara Kelley, Hearing Loss Association of America, Bethesda, Maryland
- Jean A. King, Ph.D., Worcester Polytechnic Institute, Massachusetts
- Michael I. Kotlikoff, V.M.D., Ph.D., Cornell University, Ithaca, New York
- Jennifer J. Manly, Ph.D., Columbia University, New York, New York
- Lauren Silvis, J.D., Tempus, Inc., Washington, District of Columbia

Who

About the [Division of Program Coordination, Planning, and Strategic Initiatives \(DPCPSI\)](#): DPCPSI, in the NIH Office of the Director, identifies emerging scientific opportunities, rising public health challenges, and scientific knowledge gaps that merit further research. The Division plans and implements trans-NIH initiatives supported by the Common Fund and coordinates research and activities related to AIDS, behavioral and social sciences, women's health, disease prevention, dietary supplements, research infrastructure, sexual and gender minority health, tribal health, data science, and nutrition.

About the [National Institutes of Health \(NIH\)](#): NIH, the nation's medical research agency, includes 27 Institutes and Centers and is a component of the U.S. Department of Health and Human Services. NIH is the primary federal agency conducting and supporting basic, clinical, and translational medical research, and is investigating the causes, treatments, and cures for both common and rare diseases.
