

ORIP

Concept Clearance: Reissue - PAR-15-156 (Limited Competition), PAR-19-175 (Limited Competition)

Mutant Mouse Resource and Research Centers (MMRRCs) and the Informatics, Coordination and Service Center (ICSC) for the MMRRCs

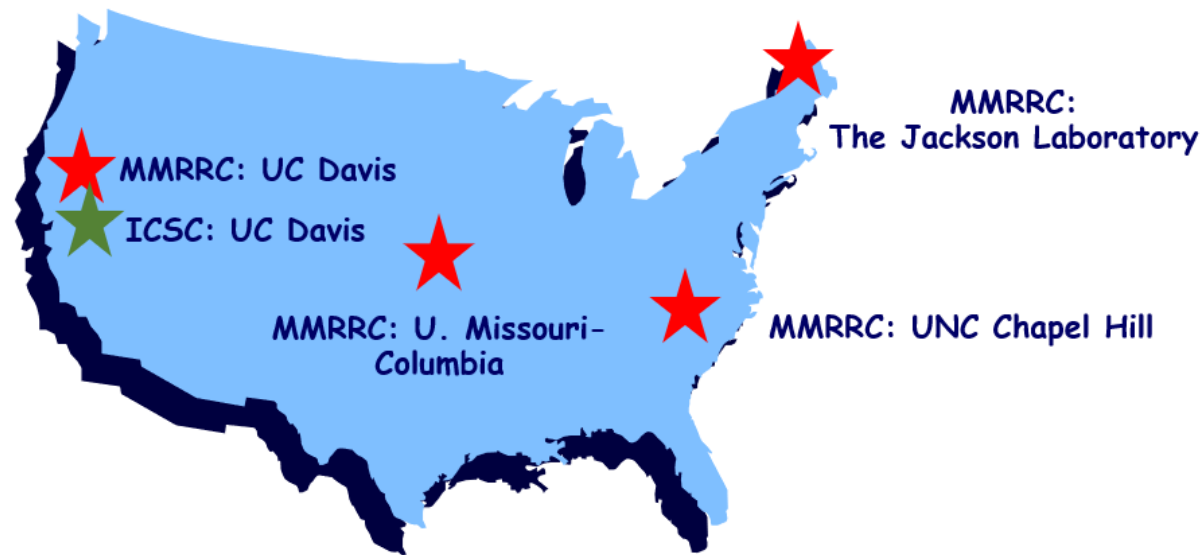

Objective: To support the continued acquisition, distribution and cryopreservation of scientifically valuable, genetically engineered mouse strains and mouse ES cell lines including the maintenance of the associated ICSC

Funds Available and Anticipated Number of Awards: Up to four MMRRCs and one ICSC contingent upon NIH appropriations

Award Project Period: 5 years

Council Action: Vote for continued support of the “MMRRCs and the ICSC for the MMRRCs”

MMRRC Consortium

The MMRRC Consortium consists of four Centers located at the University of North Carolina at Chapel Hill, University of Missouri, University of California at Davis, and the Jackson Laboratory.

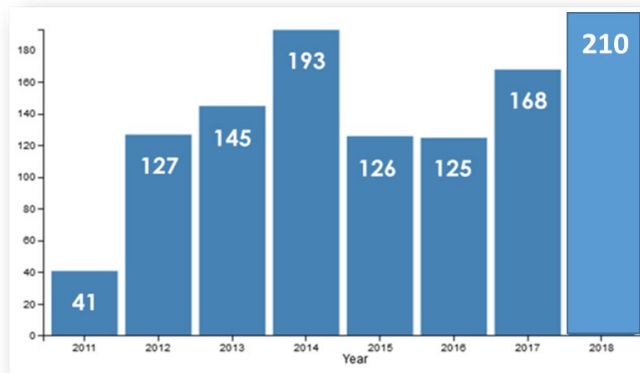

An Informatics, Coordination, and Service Center (ICSC) located at University of California at Davis provides informatics and coordinating services to support the function of the MMRRC Consortium

MMRRC Progress and Impacts Reported by ICSC

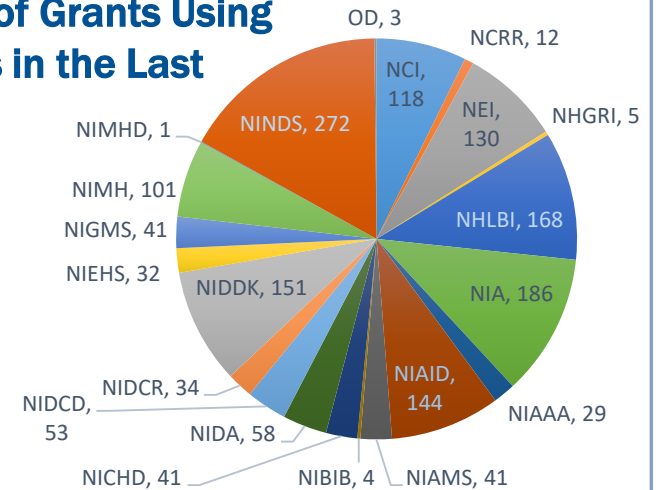

The collection consists of 44,964 unique mutant alleles (submissions include live mice, frozen germplasm, or ESCs).

In the last 11 years, the MMRRCs have received 12,232 orders from 7,559 unique investigators at 3,835 research institutions.

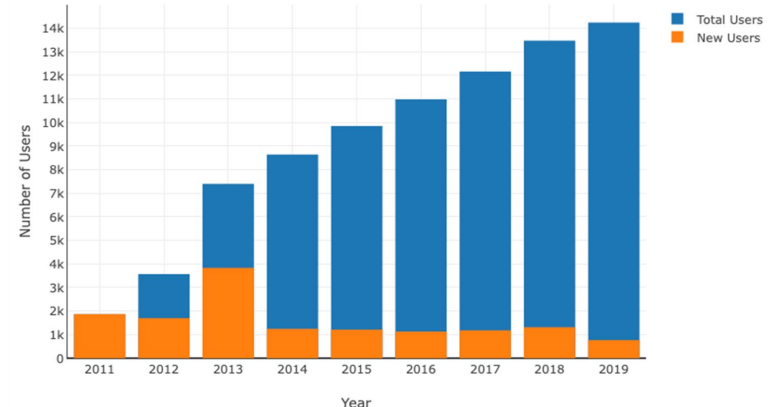

Curated Submissions: Live Animals or Frozen Sperm (by Year)

Number of Grants Using MMRRCs in the Last 8 years

Users by Year
