

The NIH Tribal Health Research Office invites you to join us in honoring

Native American Heritage Month

Monday, November 19, 2018

10:30 – 11:30 a.m.

Main NIH Campus, Building 1, Wilson Hall

Videocast link: <https://videocast.nih.gov/live.asp?live=28898>

Dr. Joseph Gone is a clinical-community psychologist and Professor of Anthropology and of Global Health and Social Medicine at Harvard University.

In his interdisciplinary research, Dr. Gone examines cultural influences on mental health status, as well as the intersection of evidence-based practice and cultural competence in mental health services. A citizen of the Gros Ventre tribal nation of Montana, he has investigated these issues through collaborative research partnerships in both reservation and urban American Indian communities. As this celebration's special guest, Dr. Gone will share his thoughts and discuss American Indian therapeutic traditions and modern health treatments.

Dr. Gone is the recipient of several fellowships and career awards, he completed a residency at the Center for Advanced Study in the Behavioral Sciences at Stanford University in 2011. In 2014, he was named a Fellow of the John Simon Guggenheim Memorial Foundation, and he is currently a Fellow in the Interdisciplinary Research Leaders Program of the Robert Wood Johnson Foundation. He earned his undergraduate degree from Harvard College in 1992 and his doctorate in clinical-community psychology from the University of Illinois at Urbana-Champaign in 2001.
